INDEX TO VOLUME LII

SUBJECTS

PAGE

Absorption at the Heads of Helium Bands in the Spectrum of Gamma Argus, Temporary Shifting. *C. D. Perrine* 39

Abstracts, Preparation of 127, 263

γ Argus, Temporary Shifting Absorption at the Heads of the Helium Bands in the Spectrum of. *C. D. Perrine* 39

Atoms, Radiation Pressure on Electrons and. *Leigh Page* 65

Brightness of the Galactic System as Seen from a Distant External Point and a Comparison with Spiral Nebulae, Surface. *Frederick H. Seares* 162

Brightness of the Night Sky. *Gavin J. Burns* 123

Calcium, Revision of the Series in the Spectrum of. *F. A. Saunders* . 265

Cathode Rays in Air, Excitation of Light by. *Gordon S. Fulcher* . . 278

U Cephei, Photometric Study of. *Raymond Smith Dugan* 154

13 Ceti, Perturbations of the Orbit of the Spectroscopic Binary. *J. S. Paraskévopoulos* 110

Clusters, Studies Based on Colors and Magnitudes in Stellar.
Seventeenth Paper: Miscellaneous Results. *Harlow Shapley* . . 73
Eighteenth Paper: The Periods and Light-Curves of 26 Cepheid Variables in Messier 72. *Harlow Shapley* and *Mary Ritchie* . 232

Color of the Nebulous Stars. *Frederick H. Seares* and *Edwin P. Hubble* 8

Color-Sensitiveness of Photo-Electric Cells. *Eleanor Frances Seiler* . 129

Contraction and Distortion on Photographic Plates, Image. *Frank E. Ross* 98

Distribution of Stars in Space Especially in the High Galactic Latitudes. *J. C. Kapteyn* and *P. J. Van Rhijn* 23

Electrons and Atoms, Radiation Pressure on. *Leigh Page* 65

Errata 317

Excitation of Light by Cathode Rays in Air. *Gordon S. Fulcher* . . 278

Excitation of the Spectrum of Helium. *K. T. Compton* and *E. G. Lilly* 1

Furnace, Experiments on the Possible Influence of Potential Difference on the Radiation of the Tube Resistance. *Arthur S. King* . . 187

Galactic Latitudes, Distribution of Stars in Space Especially in High. *J. C. Kapteyn* and *P. J. Van Rhijn* 23

Galactic System as Seen from a Distant External Point and a Comparison with Spiral Nebulae, Surface Brightness of the. *Frederick H. Seares* 162

Excitation of the Spectrum of Helium. *K. T. Compton* and *E. G. Lilly* 1

Furnace, Experiments on the Possible Influence of Potential Difference on the Radiation of the Tube Resistance. *Arthur S. King* . . 187

Galactic Latitudes, Distribution of Stars in Space Especially in High. *J. C. Kapteyn* and *P. J. Van Rhijn* 23

Galactic System as Seen from a Distant External Point and a Comparison with Spiral Nebulae, Surface Brightness of the. *Frederick H. Seares* 162

PAGE

Gases in Vacuum Tubes, Spectra of Some Compound. *W. H. Bair* . 301
Helium, Excitation of the Spectrum of. *K. T. Compton* and *E. G. Lilly* 1
Image Contraction and Distortion on Photographic Plates. *Frank E. Ross* 98
Isotopes, Infra-Red Spectra of. *F. W. Loomis* 248
RT Lacertae, Elements of the Eclipsing System. *Mary Fowler* . . 257
Magnitudes in Stellar Clusters, Studies Based on the Colors and.
Seventeenth Paper: Miscellaneous Results. *Harlow Shapley* . . 73
Eighteenth Paper: The Periods and Light-Curves of 26 Cepheid Variables in Messier 72. *Harlow Shapley* and *Mary Ritchie* . . 232
Magnitudes of Faint Comparison Stars for Nova Persei, No. 2. *Frederick H. Seares* 183
Messier 72, The Periods and Light-Curves of 26 Cepheid Variables in. *Harlow Shapley* and *Mary Ritchie* 232
Nebulae, Surface Brightness of the Galactic System as Seen from a Distant External Point and a Comparison with Spiral. *Frederick H. Seares* 162
Nova Persei, No. 2, Magnitudes of Faint Comparison Stars for. *Frederick H. Seares* 183
Orbit of the Spectroscopic Binary 13 Ceti, Perturbations of. *J. S. Paraskévopoulos* 110
Photo-Electric Cells, Color-Sensitiveness of. *Eleanor Frances Seiler* 129
Photographic Plates, Image Contraction and Distortion on. *Frank E. Ross* 98
Photographic Sharpness and Resolving Power. *Frank E. Ross* . . 201
Photometric Study of U Cephei. *Raymond Smith Dugan* . . . 154
Photometry and the Purkinje Effect, Photographic. *Frank E. Ross* . 86
Potential Difference on the Radiation of the Tube Resistance Furnace, Experiments on the Possible Influence of. *Arthur S. King* . . 187
Pressure on Electrons and Atoms, Radiation. *Leigh Page* . . . 65
Purkinje Effect, Photographic Photometry and the. *Frank E. Ross* . 86
Radial Velocities of Eighteen Stars. *Adolf Hnatek* 198
Radiation of the Tube Resistance Furnace. Experiments on the Possible Influence of Potential Difference on the. *Arthur S. King* . 187
Resolving Power, Photographic Sharpness and. *Frank E. Ross* . . 201
Sky, Brightness of the Night. *Gavin J. Burns* 123
Spectra of Isotopes, Infra-Red. *F. W. Loomis* 248
Spectra of Some Compound Gases in Vacuum Tubes. *W. H. Bair* . 301
Spectroscopic Binary 13 Ceti, Perturbations of the Orbit of the. *J. S. Paraskévopoulos* 110
Spectrum, Extension of the Ultra-Violet. *R. A. Millikan* . . . 47
Spectrum of Calcium, Revision of the Series in the. *F. A. Saunders* . 265
Spectrum of Gamma Argus, Temporary Shifting Absorption at the Heads of the Helium Bands in the. *C. D. Perrine* 39

PAGE

Spectrum of Helium, Excitation of the. *K. T. Compton* and *E. G. Lilly* 1

Spectrum of Zinc in the Extreme Ultra-Violet Region, Vacuum Hot-Spark. *R. A. Sawyer* 286

Stars, Color of the Nebulous. *Frederick H. Seares* and *Edwin P. Hubble* 8

Stars, Radial Velocities of Eighteen. *Adolf Hnatek* 198

Stars for Nova Persei, No. 2, Magnitudes of Faint Comparison. *Frederick H. Seares* 183

Stars in Space Especially in High Galactic Latitudes, Distribution of the. *J. C. Kapteyn* and *P. J. Van Rhijn* 23

Studies Based on Colors and Magnitudes in Stellar Clusters.

Seventeenth Paper: Miscellaneous Results. *Harlow Shapley* . . 73

Eighteenth Paper: The Periods and Light-Curves of 26 Cepheid Variables in Messier 72. *Harlow Shapley* and *Mary Ritchie*. . 232

Ultra-Violet Spectrum, Extension of the. *R. A. Millikan* 47

Variables in Messier 72, The Periods and Light-Curves of 26 Cepheid. *Harlow Shapley* and *Mary Ritchie* 232

Zinc in the Extreme Ultra-Violet Region, Vacuum Hot-Spark Spectrum of. *R. A. Sawyer* 286
